Wrightstown, NJ, 08562

Comments

“ With deepest respect and gratefulness to Dr. Joseph Cullen Jr. family:

I am a total stranger desperately seeking hope for a dearest friend who has just been diagnosed with phase IV Pancreatic cancer and came across Dr. Cullen's research work on Pharmacological Ascorbate.

I am no doctor, but I am educated enough to have an understanding of Dr. Cullen's work. I wanted to know more about him and was praying to be able to contact him. He is in God's presence now, of this I'm sure for anyone who devotes a lifetime to help others are God's children. I am a Mexican whose parents gave the opportunity of doing my college studies in The U.S. I live in the Yucatan peninsula and just wanted to pay my respects and say how deeply sorry I am for your loss and the loss of those whom he was trying to bring hope and a cure for such aggressive disease.

May The Lord grant you the peace you need. I do understand the pain you are going through, since I have lost one of my two sons.

Sincerely,

Cecilia Lopez-Anthor
